## OBJECTIVE

- As a computer science engineering student, I am looking for a position where I can use my skills and learn new things to help an organization succeed.

## EDUCATION

<b>Ramaiah Institute of Technology Bangaluru, Karnataka</b>	2025 – Present
Bachelor of Technology in CSE -Artificial Intelligence and Machine Learning Engineering, (CGPA 7.81/10)	
<b>Sarvajna PU college of science (PUC) Class XII (Percentage – 83.83%)</b>	2020
<b>Chamundeshwari High School (SSCL) Class X (Percentage – 77.12%)</b>	2018

## INTERNSHIP

- |  |                      |
|--|----------------------|
| <b>CloudRunr :-AI/ML Backend Developer</b>   | April 2025 - Present |
| <ul style="list-style-type: none"><li>Working on FastAPI as a backend developer, integrating AWS services with AI/ML models.</li><li>Building scalable APIs and deploying ML models for real-time inference and data processing.</li></ul> |                      |

- |   |              |
|---|--------------|
| <b>School Dekho :- Frontend Developer</b>   | October 2024 |
| <ul style="list-style-type: none"><li>Developed responsive web applications using React.js and Node.js in the MERN stack.</li><li>Collaborated in an Agile environment, emphasizing clean UI and optimized performance.</li><li>Gained backend exposure and improved debugging skills through full-stack contributions.</li></ul> |              |

## PROJECTS

### All in One | Restaurant ( Source Code )

- Developed a restaurant management system using React.js and Firebase.
- Enabled booking of rooms, halls, tables, with full admin controls.
- Designed secure user authentication and profile/order tracking features.

### Task Management Dashboard( Source Code )

- Built with React.js, Redux, Firebase, MongoDB, Tailwind CSS, and Chart.js.
- Enabled drag-and-drop task management with real-time synchronization.
- Integrated Chart.js for interactive performance analytics.

### V-shop | E-Commerce ( Source Code )

- Developed a robust e-commerce platform using React.js, Redux, and Firebase.
- Implemented secure authentication and efficient real-time database operations.
- Used Redux for state management and Firebase for scalable backend services.

## SKILLS AND INTERESTS

- Languages:** C, C++, Java, Python
- Frontend:** HTML, CSS, Tailwind CSS, JavaScript, React.js
- Backend:** Express.js, Node.js, FastAPI, Firebase.
- Database:** MongoDB, MySQL, SQL, NoSQL
- Developer Tools:** VS Code, Git, GitHub, Postman, Vercel, Netlify
- Technologies & Concepts:** REST APIs, Web Development, UI/UX Design, AI, Machine Learning, NLP, OpenCV, NumPy, NLTK, LLMs, Problem Solving

## ALGORITHMIC COMPETITION

### GeeksForGeeks | Profile

- Institute Rank **300th overall**. Tackled over 150+ problems covering various topics.
